**Narrative description of Project:**

Two – story building that was designed and constructed at the late 30's (1938-1940).

It's used as a Cinema Hall since 1989, by the first owner, while in 2001 it was declared as a protected monument.

Due to the age and wear of the building, and taking under consideration the results of the structural investigations a Structural and Earthquake Vulnerability Assessment was elaborated. And a new repair and strengthening design was proposed.

**Description of services provided within the assignment:**

- Structural and Geotechnical Investigations
- Structural and Earthquake Vulnerability Assessment
- Final Structural Repair and Strengthening Design
- Detailed Design
